

Students in the Center of Excellence in Remote Sensing Education and Research (CERSER) took part in a virtual conference with students at Grambling State University as part of the American Education Week Teaching and Learning Symposium.

This conference was sponsored by NASA ESTEEM PROJECT and allowed CERSER students to observe activities and projects that the teacher candidates and advanced candidates completed to incorporate NASA Climate Education Concepts into the Teacher Education component.

The project at Grambling State University is headed by Dr. Loretta Jagers in the Curriculum and Instruction Department (College of Education). She assisted her pre-service teacher education majors in writing illustrated books on climate change. Dr. Jagers participated in both the 2013 and 2014 NASA ESTEEM cohorts at Elizabeth City State University.
