

Donovan Doss

I am a junior mechanical engineering student at North Carolina A&T State University. I decided to study mechanical engineering because I did well in math and science classes and have always been interested in working with engines and planes. I truly believe in hard work. As a student majoring in mechanical engineering I have been faced with many challenges, but determination and diligence have pushed me through. I am also involved in campus organizations that actively participate in community service which will help prepare me for my future goals. After graduating with a B.S. in Mechanical Engineering, I desire to find a position in my field preferably with an automotive or aeronautic manufacturer. Then with this experience, I would like to return to school to obtain a Master Degree in Business Administration and increase opportunities for students of color in the engineering profession.
