

89th Annual National Technical Association National Conference

Theme: “Multigenerational and Interdisciplinary Approaches for STEM Success”

Morgan State University-September 20-22, 2017

Since 1925, the National Technical Association (NTA) has served technical practitioners and educators who are historically underrepresented in STEM professions. NTA promotes career development for STEM professionals, introduces underserved youth to opportunities in science and technology, and honors and preserves the legacy of men and women of color for their outstanding contributions to the world of science and technology. The Career Opportunity Fair on September 22 is a one-stop opportunity to connect with a diverse working of STEM professionals, college students and recent graduates. Go to www.NTAonline.org to register and learn more about this event. August 31, 2017 is the deadline for early bird discounts.
