

Hello, My name is Taeyonn Reynolds and I am from Virginia Beach, Virginia. I am currently attending Elizabeth City State University where I am pursuing a degree in Computer Science. I recently graduated from Salem High School.

I have always been enthusiastic about computer science and that contributed to me choosing that to be my major. Majoring in computer science will allow me to get involved in intensive research that will relate directly to my future career. Subsequently when I decided to attend Elizabeth City State University I found out that the Center of Excellence in Remote Sensing Education and Research (CERSER) had an excellent program to offer. The program provides students with excellent trainings that are then applied in a research project.

Throughout my time at Elizabeth City State University I would like to receive my Bachelor's Degree in Computer Science and find potential job opportunities. To do this I will need to maintain good grades and participate in internships throughout my years.
