RESEARCH EXPERIENCE

---

5/04-7/04 Elizabeth City State University Elizabeth City, NC

- *Intern, Undergraduate Research Experience in Ocean and Marine Science  
Dolphin Behavior Correlation with SST, Mentor Kevin Foss*
- The purpose of this research was to determine if sea surface temperatures and chlorophyll alpha can be used in determining the presence or absence of dolphins. This would enable individuals to locate dolphins without having to physically be on the water looking for them. Because of the [Marine Mammal Protection Act of 1972](#), the Navy is seeking more efficient ways to locate dolphins in order to avoid future harassment
